Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Furukawa et al US 6114582, Buschmann et al US 6344558, Shell et al DN 96:40926, Chiou et al DN 118:247588 and/or Bodor et al DN 127:325913.

Furukawa et al teach hydroxyphenylalkylamine compounds as recited in the claims. See, for example, column 4 lines 5-47 where R¹ is alkoxy, R² is hydrogen, R³ is alkoxy or halogen, R⁴ is hydroxyl and R⁵ is hydrogen. Buschmann et al teach analogous pharmacological componds . See, for example, column 2 lines 1-38. Shell et al DN 96:40926, Chiou et al DN 118:247588 and/or Bodor et al DN 127:325913 all teach analogous compounds for use in treating glaucoma. See the respective abstracts.

The references differ in having hydrogen instead of methyl in the carbon adjacent to the nitrogen moiety. However, the replacement of methyl with

Art Unit: 1625

a hydrogen atom on linking chain is normally within the sphere of obviousness that surrounds the known compound. In re Wood 199 USPQ 137. In the instant case, modification of closely structurally related compounds would be expected to maintain the pharmacological activity i.e. reasonable expectation of success.

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond Covington whose telephone number is (571) 272-0681. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres at telephone number (571) 272-0867.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
